WORK EXPERIENCE

SENIOR ENGINEER @ MAGNIFY

June 2023 - Today

Early engineer at an early-stage startup, pivotal in cross-functional collaboration with an international team spanning the US, Belfast, Singapore and India. Specialized in front-end development with React, backend integrations using Node.js, and leveraging AWS for scalable cloud solutions. Facilitated seamless communication and project alignment across time zones, driving key product milestones.

SENIOR ENGINEER @ INTRO

May 2022 - March 2023

Building out the web experience for the Intro application with TypeScript, Next.js and Tailwind. Lots of hands on product and Figma based design work along with everything else you would expect from an early stage startup.

SENIOR ENGINEER @ APPTENTIVE

August 2013 - February 2022

Started with refactoring demo day monolith code from CoffeeScript, Backbone, KnockoutJS and Ruby on Rails to building new feature work in React / Flux with Redux on Netlify. Building microservices in Node on HAPI to reworking and moving other services to new Go codebases. Pure JavaScript WebSDK is my current focus.

WEB DEVELOPER @ HARK (ENTERTONEMENT)

February 2011 - June 2013

Started out focusing on the front end, but shortly after, took responsibility of several backend components and occasional dev ops tasks. Grew with the team to at most 20 people, several complete redesigns, many late nights refactoring and ultimately starting from scratch 3 times. Plenty of Rack, Rails, Sinatra, and RubyGems fun.

SOFTWARE ENGINEER @ CAFEPRESS

May 2010 - February 2011

Designed, developed, maintained & coordinated the launch of various in-store applications and internal business technologies. Specificly focusing on a Multi-Product Design Application using HTML5 + Canvas, JavaScript / jQuery, PHP, SVG and assisted development of web services on a C# on and IIS 7 backend.

EDUCATION

GRAPHIC DESIGN @ MIDDLE TENNESSEE STATE UNIVERSITY

August 2004 - May 2009

Completed my BFA in the Graphic Design program with a focus on typography, multimeda design, web design, screen printing and Asian art history.

HUME-FOGG ACADEMIC MAGNET HIGHSCHOOL

August 2000 - May 2004
